AEGIS
EARLY WARNING SYSTEM

We guard your internet facing systems, so you can get on with business.

AEGIS-EW is an innovative online platform that gives you visibility over all your digital assets. We give you complete control of your cyber security risk and make it easy for you to be cyber safe.

Cyber Crime Protection

AEGIS-EW scans can help you prevent ransomware, malware, and other Cyber Crime attacks. Most attacks and breaches on your website, mail system or servers come from Cyber Crime bots that find 'open doors' into your systems. We detect those openings and help you to shut them before the can be exploited.

Working From Home Protection

With the increase in employees having to work remotely, now more than ever it is critical to secure your digital assets. Unsecured IT infrastructure can cause vulnerabilities within your network so by having AEGIS-EW scan your domains on a regular basis you'll be proactively alerted to any risks.
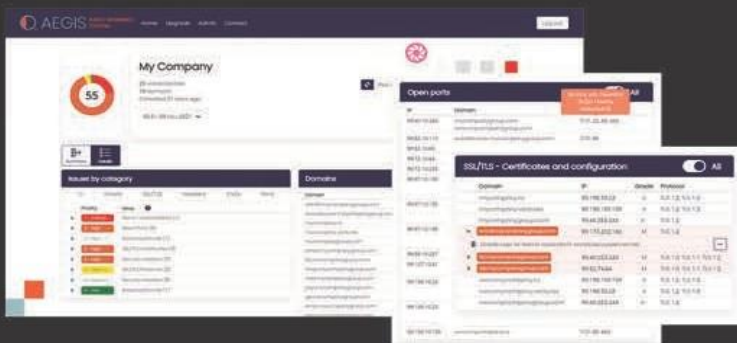

Be A Technical Hero

We provide the technical detail in an easy-to-understand format turning your team into the Cyber Security heroes for your business. Our cost-effective system gives you all the information you need to fix your own technical issues or to pass it on to your IT provider. You will be able to discover, mitigate, track and secure your business from day one!

Deep Dark Dive

AEGIS-EW scours the dark web for information about you and your business systems including breached email/passwords, open server ports, known vulnerabilities and weak certificates. All the basic data that Cyber criminals use to deface or breach your website, gain access to your systems and using your data, perform a ransomware or similar attack.
